DETAILED ACTION

Allowable Subject Matter

1. Claims 1-10 are allowed.

Drawings

2. The drawings filed on 03/17/2000 are acceptable subject to correction of the informalities, the formal drawing is required. In order to avoid abandonment of this application, correction is required in reply to the Office action. The correction will not be held in abeyance.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, and similarly in claim 4 with two tuners and its corresponding method claim 6, the prior art of records issued to Grabb, Limberg, and Henderson fails to either alone or combine to teach or suggest an apparatus for deriving a channel map for a digital television receiver comprising at least the step of including *an amplitude detector for detecting and measuring the amplitude of the tuned television signal from the tuner, and then a comparator for comparing the measured and tuned television signal to a threshold value, and based on the comparison process, for providing and/or change a value in the channel data map structure to indicate that the specified channel is received by the DTV receiver*. Prior arts do teach to have amplitude detection, but not *detecting the tuned television signal right after the tuner for the purpose of achieving a channel map for the DTV receiver*.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Krimmel et al, Patel et al. and Steckler et al. (PTO 892 attached) disclose systems related to have amplitude detector with different approaches.

6. **Any response to this action should be mailed to:**
